Solving Industry-Specific Challenges

Media & Entertainment

Create Popular Media Streaming Apps
With Our Time-Tested App
Development Services.

Sports & Fitness

Tune Into The Market Of Fitness
Mobile Apps For Personal Health
And Sports Activities.

Healthcare

Perfect Patient Care And Medical Staff
Efficiency With Data Solutions And Online
Consultations.

Real Estate

Architect An Innovative Way Of Buying,
Selling And Renting Properties With Real
Estate Apps.

Logistics & Tracking

Improve The Location Tracking,
Supply Chain Business Niche
With A Solid Tracking App.

Retail & E-Commerce

Get Profits With A Multi-Vendor
ECommerce Store And Beyond.

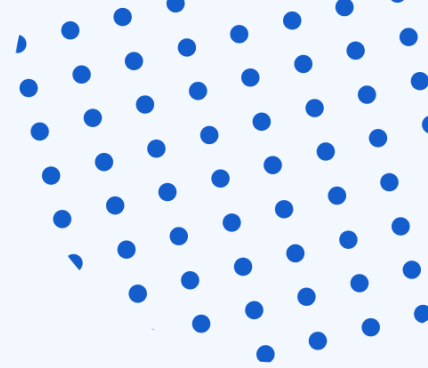

Education & E-Learning

Boost Interactivity And Learning
Capabilities With Customized
Solutions For EdTech.

Dating

Refine Communication And
Raise Interaction Between
Dating App Users.

End-To-End Development - Process In Action

Discovery Phase

Initial Idea Discussion And Project Requirements Gathering To Get The Whole Understanding And Correctly Plan Further Work.

MVP Development

Market Validation Of A Product Idea Via A Minimum Viable Product To Examine The Unknowns, Test Its Potential And Scale Quickly.

Concept & Design

Reasoning Out The Project Architecture With Design Ideation And Interactive Prototyping To Imagine The Future Product.

Product Delivery

All Cycle Of Software Development Including PM Services And QA Testing To Ensure The Product Of First-Class Quality.

Estimation & Planning

Detailed Project Estimation With Planning Each Product Development Iteration To Fully See The Comprehensive Scope Of Work.

Support & Maintenance

Post-Release Support Including Feature Update And Product Improvement To Tackle The Ever-Changing Market Conditions.

Technology Stack We Are Confident In

Web

- Frontend: JavaScript, Vue.js, React.js
- Backend: PHP, Laravel, Node.js
- Database: Pure Sql, SqlCipher
- Infrastructure: SIP Framework

Mobile

- iOS: Objective-C, Swift
- Android: Java, Kotlin

Design

Figma, Sketch, Adobe
Photoshop, Illustrator, After
Effects

DanceBug

Automation of the process of judging the professional dance contests, the possibility for judges to watch both, live streams from the dancefloor and recorded and uploaded to the system dance recordings

Services:

- Web Development (Frontend / Backend)
- Outstaff
- Support

Technologies:

PHP 5.4, MySQL, Flight PHP for REST API, MariaDB 5.5, jQuery, Bootstrap

Duration:

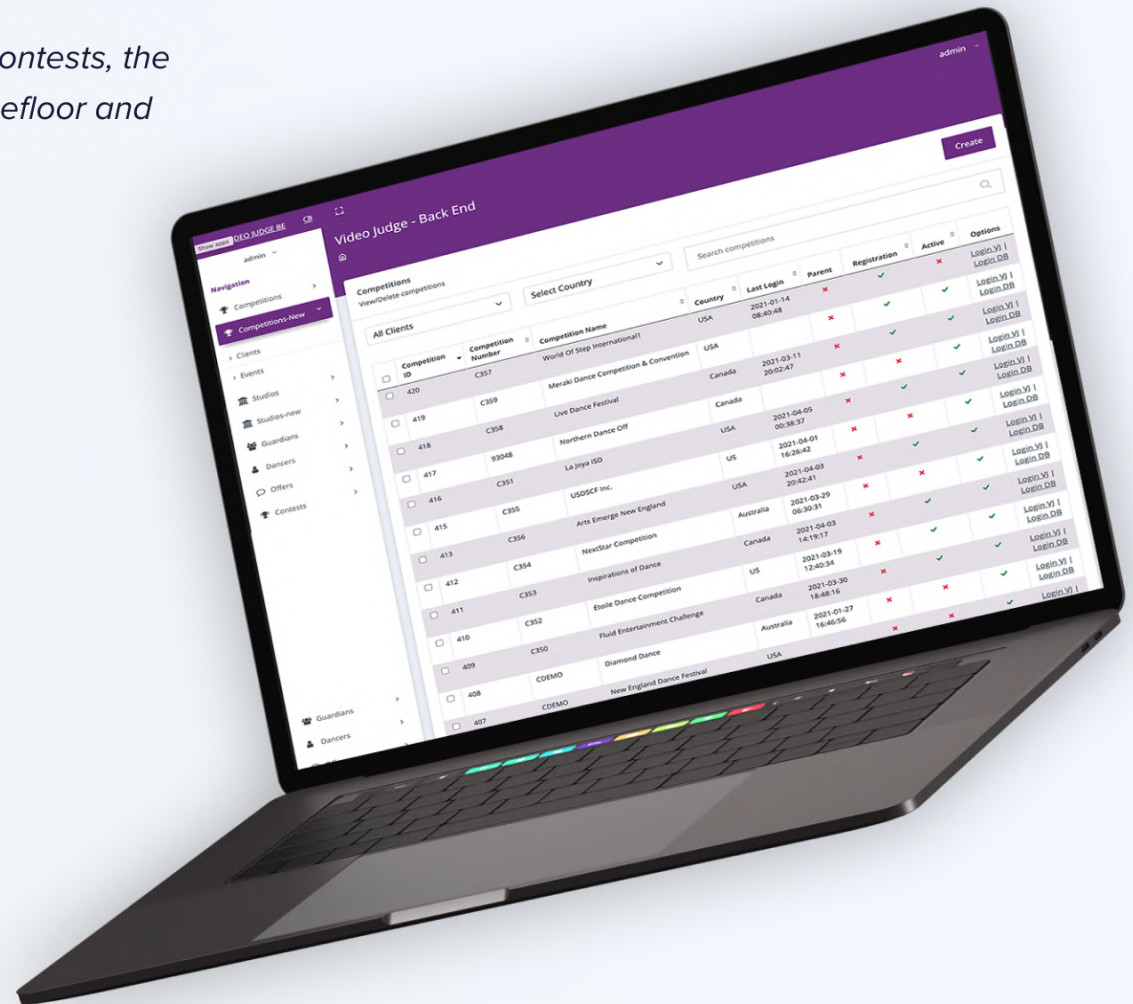

Since 2020

Industry:

Entertainment

Results:

- Improved the functionality for creating events;
- Implemented sending the PDF reports in emails from the site;
- Developed the resolution for managing the contests;
- Working with big and complex database queries;
- Written manually coding the unique solution for large enterprises within the system.

TMM

A digital platform for an international freight forwarder that helps to provide all kinds of transportation services via a user-friendly interface and order management system

Services:

- Website Development
- UX/UI Design

Platforms

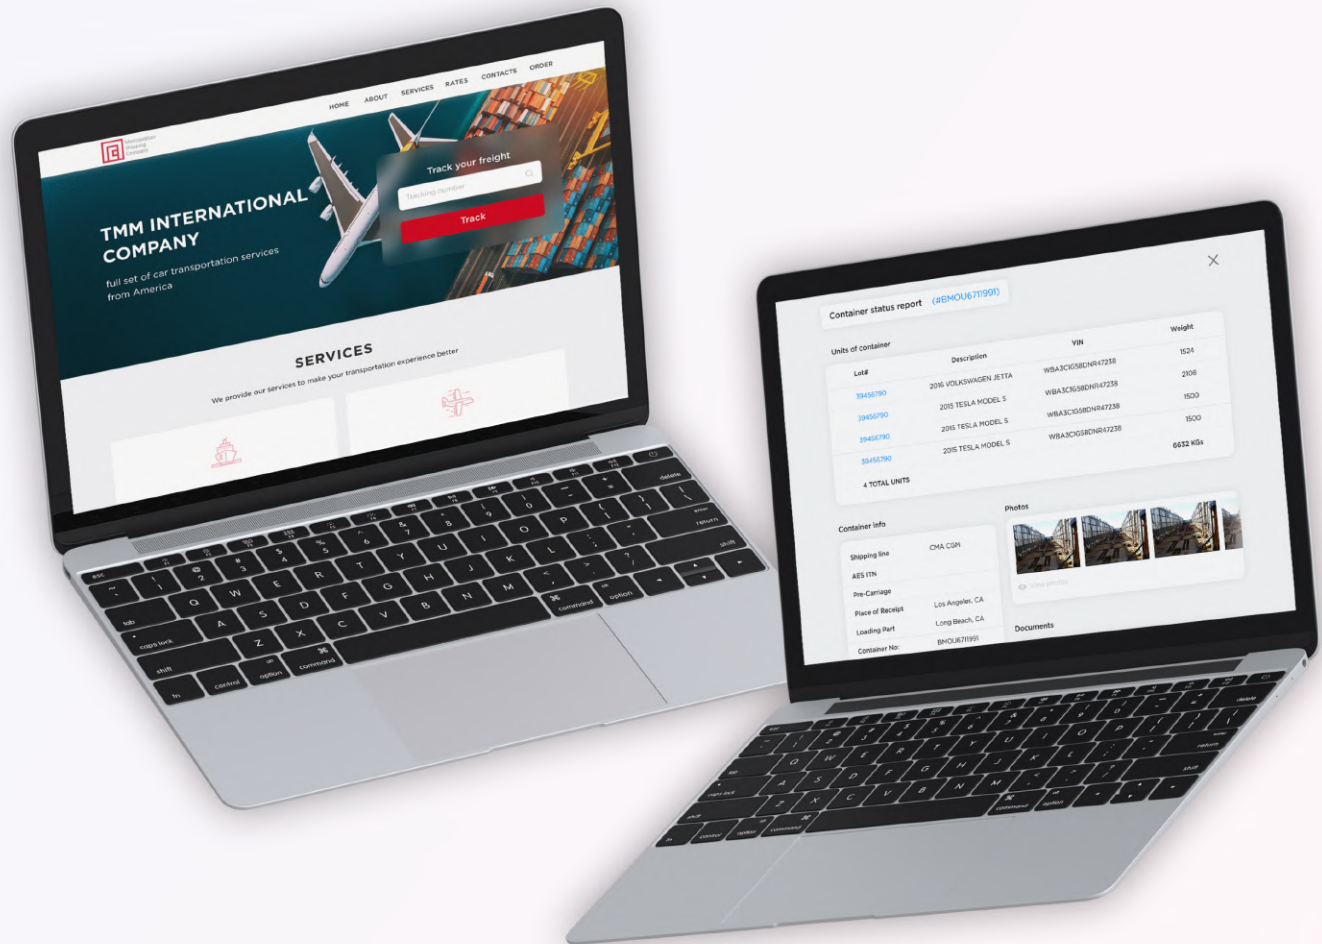

Web

Industry:

Logistics & Tracking

Results:

- Online company presence
- 78% faster order processing with a multi-functional ordering system

Sunny Studio

It is the online system where customers can choose and book a convenient time, as well as pay for services.

Services:

- Backend
- User interface development
- Prototyping
- UX/UI Design

Technologies:

Vue.js, Laravel, Facebook API,
Elastic Search

Duration:

For 3 months

Industry:

Entertainment

Results:

- Sorting by rooms available for booking is implemented;
- On the website of the photo studio, a gallery with photos of locations is displayed;
- If necessary, users can leave a request for a call from the administrator to clarify the details;
- Added a calendar with the ability to select the date and time, then book a location, as well as pay for the reservation online.

HRM System

Development of an HRM system for monitoring and recording employees' working time based on data entered from a third-party time tracker. Based on the data on the worked time, the system generates reports on the completed tasks and the time spent.

Services:

- Specification
- User interface development
- Backend
- UX/UI Design

Technologies:

React.js, Laravel, Node.js

Duration:

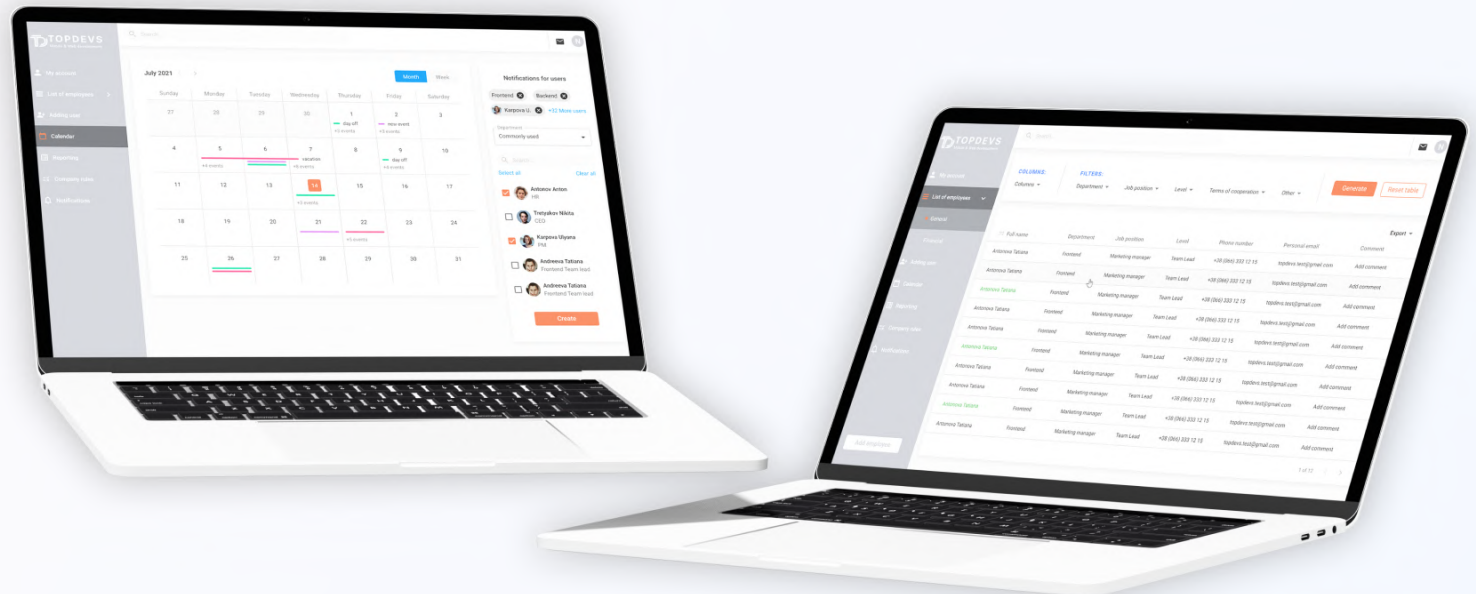

Since 2020

Industry:

HR management system

Results:

- Information about vacations, sick days and holidays is entered into the corporate calendar of the system.
- The formation of a payroll based on various data has been implemented, such as the employee's rate, bonuses, overtime, the number of working days in a month, sick leave and vacation.

Quick Size

An application that allows you to select clothing sizes based on comparisons of data from other users who have added clothing from various brands to their wardrobe using the application. It was needed to develop the backend part of the app.

Technologies:

PHP (Laravel), MySQL, Docker, Amazon, Firebase

Duration:

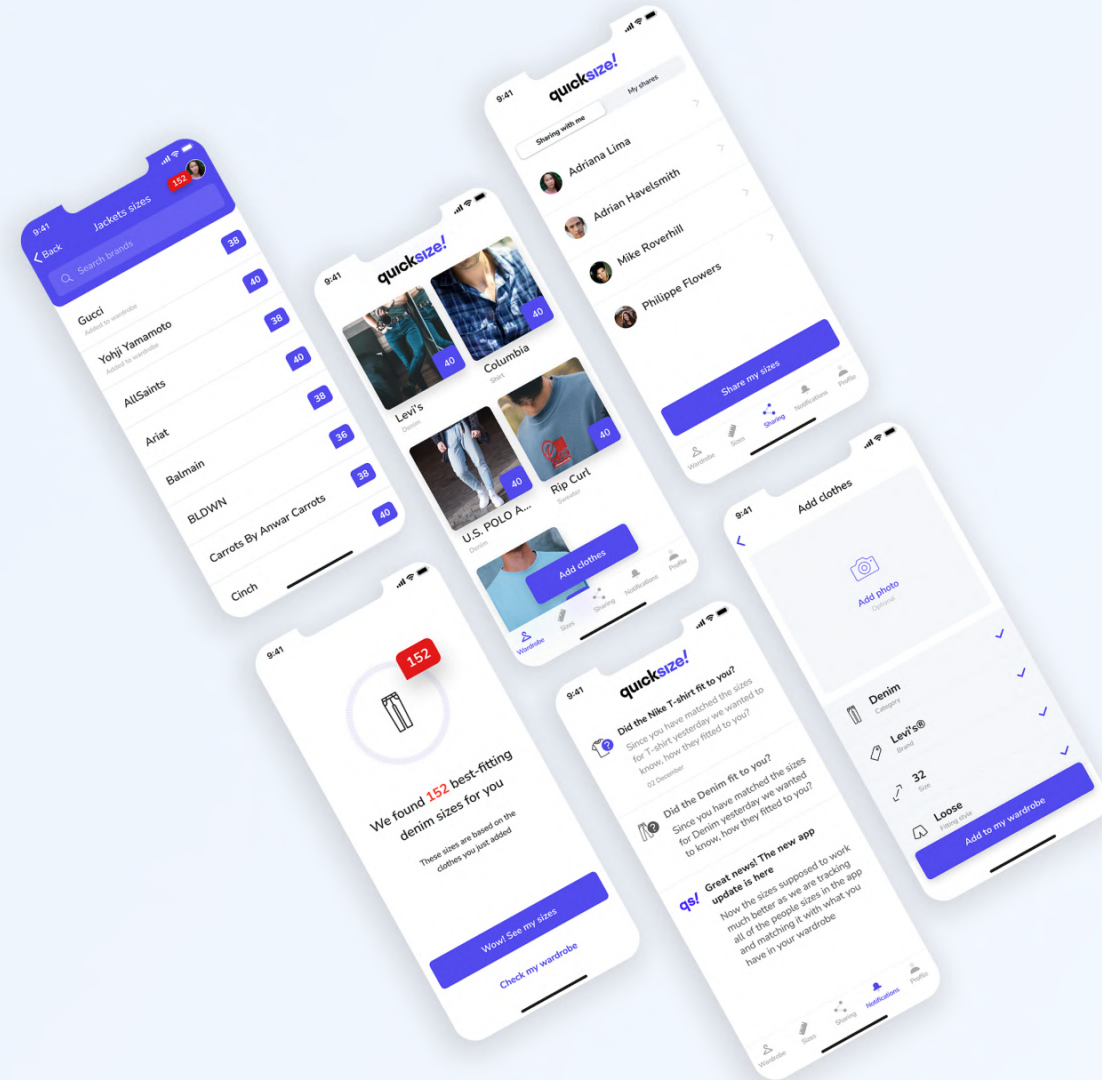

Since 2020

Industry:

Retail, E-commerce

Results:

- Developed a unique solution for proper operation of matching clothes' sizes for users for suggesting other brands' clothes based on the added clothing in the app to users.

Calibre

An electronic passport for luxury watches that allows watch owners to track the authenticity of a particular device and protect them from fakes. The app helps to find the closest authorized service centers and monitor all repair works to make sure there were no forged details installed.

We've developed an MVP with the following core features:

Real-Time Repair Monitoring

Users are able to monitor the current stage and the expected time of the repair process delivery.

Ownership Transfer

Watch owners can sell their devices and transfer the watch records with the entire history to the new owner via a QR code scanning.

Service Center Tracking

Users can accurately find an authorized repair center within the specified radius on the map.

Manufacturing Control

A watchmaker can control the watch repair process conducted by the service center.

Technologies:

PHP (Laravel), MySQL,
Docker, Amazon, Firebase

Duration:

Since 2020

Industry:

Retail, E-commerce

Beauty Streaming Service

A digital platform connecting beauty industry experts with their fans via special subscriptions and live streaming sessions to master new skills. Fans can follow, donate, and learn from their favorite makeup artist, hairdresser, manicurist, etc.

Services:

- iOS App Development
- Android App Development
- Web App Development
- UX/UI Design

Results:

- Expertise monetization for beauty professionals
- Learning directly from the best beauty experts

We've developed a UX/UI design and the following core features:

Subscription

Users can choose the master of their interest and pay the specified subscription price that is divided between the platform and the beauty expert.

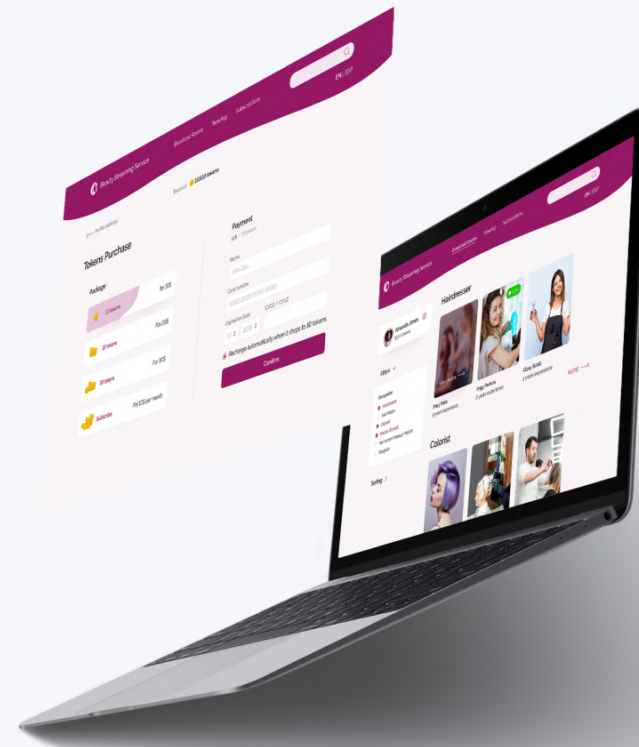

Video Streaming

Beauty professionals initiate live streaming sessions with free or paid access setting the cost per minute of viewing.

Payment System

Fans may pay online for provided services via an integrated CommerceGate payment system quickly and safely.

Let's Craft A Digital Masterpiece That Will Take You To The Leaderboards Of The Market!
